Email: nikhilsai22082007@gmail.com
Mobile: +91-9542133123

SKILLS

- **Networking Fundamentals:** TCP/IP, DNS, DHCP, Routing & Switching, VLANs, NAT, Subnetting
- **Security & Networking:** Cisco Packet Tracer, Burp Suite, Nmap, TryHackMe, Network Security, Linux Security, SIEM (Splunk), SPL, SOC Monitoring & Dashboards
- **Web & Cloud Security:** OWASP Top 10, Auth flaws, AWS & Azure basics, Shared Responsibility Model, IAM
- **Threat Analysis:** Phishing & malware indicator analysis, log/alert triage, incident documentation
- **Languages:** C, C++, Python, Bash Scripting
- **Operating Systems/Platforms:** Windows, Linux
- **Core CS Fundamentals:** Data Structures & Algorithms
- **Web & Database:** HTML, CSS, MySQL
- **Tools:** AUTO-CAD, Git
- **Soft Skills:** Problem-Solving, Team Player, Project Management, Adaptability, Team Leader

PROJECTS

Hardened Linux Server & Automated Security Hardening | Bash, UFW, Fail2Ban, auditd, Lynis | [GitHub](#) July 2026

- Identified security gaps in a default Ubuntu Server 24.04 deployment and set out to harden it against common attack vectors such as brute-force SSH access, unpatched services, and weak password policies.
- Configured SSH hardening, UFW firewall rules, Fail2Ban intrusion prevention, auditd logging, rkhunter rootkit scanning, and kernel/sysctl parameters; automated the full hardening workflow with a reusable Bash script.
- Raised the Lynis security audit score from 60/100 to 79/100 with zero remaining warnings, producing a measurable, auditable improvement in server security posture.

VaultAura — Secure Password Manager | Supabase, AES-256, RSA, Argon2 | [Live](#) March 2026

- Joined the core development team to tackle weak password hygiene and credential reuse by building a zero-knowledge password manager.
- Owned the security and cryptography layer — designed encryption mechanisms (AES-256, RSA, PBKDF2/Argon2) and the client-side encryption architecture, and built secure credential handling, weak/reused-password detection, and MFA support.
- Delivered a security-scoring and AI-powered security-analysis feature, giving users a practical way to identify and remediate weak credentials before compromise.

Coffee Shop Network | Cisco Packet Tracer, VLANs, ACLs, DHCP, DNS, NAT | [GitHub](#) August 2026

- Designed an enterprise-style network for a coffee shop requiring segmented customer, staff, and management traffic under centralized security controls.
- Implemented VLAN segmentation, inter-VLAN routing, DHCP, DNS, NAT, ACLs, and port security; configured an isolated guest Wi-Fi network to prevent lateral access to internal resources.
- Validated the design through systematic connectivity testing and fault isolation across every network layer, confirming correct traffic isolation with no unauthorized cross-VLAN access.

TRAINING

Lovely Professional University | Certificate: Ethical Hacking & Network Security Mastery | [Link](#) July 2026

- Foundational and applied concepts in ethical hacking, network security mechanisms, and security best practices.
- Network defense strategies, vulnerability assessment approaches, and security hardening techniques used in enterprise environments.
- Built the MAC Address & Vendor Lookup Tool, a network asset-identification utility for device discovery and analysis (GitHub: mac-lookup-tool).

WNS CyberSmart — Cybersecurity Awareness Program | [LinkedIn](#) August 2025

- How to communicate cybersecurity concepts — social media safety, cyberbullying, financial security, and public internet safety — to non-technical audiences.
- Developed session materials and independently delivered a structured 2-hour awareness program.
- 8th and 9th-grade students at Zilla Praja Parishad High School, Prathipadu, reaching a full classroom audience.

CERTIFICATIONS

- Ethical Hacking & Network Security Mastery | [Lovely Professional University](#) August 2026
- CompTIA Network+ Certification | [CompTIA](#) July 2026
- Cybersecurity Analyst Job Simulation | [Forge — Tata](#) May 2026
- Cybersecurity Job Simulation | [Forge — Mastercard](#) May 2026
- IT Fundamentals | [Quick Heal Academy](#) February 2026
- Network Configuration and Management | [Quick Heal Academy](#) February 2026

ACHIEVEMENTS

- Secured 3rd rank in CBSE Class 12 board examinations (MPC stream) at Narayana Junior College, reflecting consistent academic performance through senior secondary school.
- Ranked in the top 10% of users on TryHackMe, a hands-on cybersecurity training platform, through consistent practice on real-world penetration testing and security challenge rooms.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology — Computer Science and Engineering (Cyber Security & Blockchain Technology); 2024 – 2028

CGPA: 7.86

Narayana Junior College

Kurmanpalem, Visakhapatnam, Andhra Pradesh

Intermediate (MPC), CBSE; Percentage: 84%

2022 – 2024
